

ECONOMICS@DUKE

Welcome, new major!

We are very excited you have decided to pursue a bachelor's degree in economics. Please carefully review this document for helpful information about the program and its requirements.

EcoTeach (Social Sciences 138, open M-F, 9AM-4PM), is the department's center of instructional support and will be your important gateway to the undergraduate economics program for registration each semester, as well as advising and academic issues.

Orientation about the undergraduate economics program is required for newly declared majors and must be completed online. You will view several videos posted on Sakai and then take an online quiz that requires an 80% correct response rate in order to move forward to next steps, including registration and advising.

Registration each semester for first majors requires students to attend Open Advising drop-in hours at EcoTeach. Students will receive a printed Progress Report that tracks their completion of major requirements and will be cleared for registration. Second majors and minors are strongly recommended to go to such hours.

For more information about the undergraduate economics program, including the honors program and independent study opportunities, please visit <http://econ.duke.edu/undergraduate>. For specific information about the major/minor/concentration, downloadable degree checklists, and other requirements, please visit <http://econ.duke.edu/undergraduate/major-minors>. For specific faculty mentorship, beyond general and technical program advising available through EcoTeach and the faculty DUSes, please visit <http://econ.duke.edu/undergraduate/current-students/advising-tutoring> to download the mentor request form.
